Profile

Analytical, detail-oriented, and results-driven professional with over six years of progressive experience in **data analytics, monitoring and evaluation (M&E), and facilitation** within the public health and training sectors. Demonstrates proven ability to collect, analyze, and interpret complex datasets to drive data-informed decision-making and improve program performance. Experienced in facilitating workshops, providing technical support, and building capacity for data management and utilization across multiple levels. Adept at using tools such as **Excel, Google Forms, RedCap, TIER.Net, DHIS, R and EDR.Web** for data processing, reporting, and visualization. Recognized for exceptional organizational skills, stakeholder collaboration, and a passion for transforming data into actionable insights that enhance program outcomes and organizational efficiency.
